

Alex Fong

Fullstack software engineer with deep experience in designing scalable systems and processes from scratch.

Greater Madison Area, Wisconsin, USA

11 years of experience

alex@birdlaw.dev

<https://github.com/birdlavv>

Below is a non-exhaustive list of some of the notable projects I've worked on.

Work history

Data Engineer (Contract) Denari (funded AI startup)

2025 - 2025

TypeScript React Next.js WorkOS Microsoft Graph API Postgres Drizzle

- Independently built a greenfield MVP for a new product line
- Collaborated with technical and non-technical stakeholders
- Built a fully automated data ingestion and processing pipeline
- Created data visualization dashboard with single sign-on via Microsoft Entra

Software Engineer InternalStack (Spinoff project from OrderDive)

2024 - 2025

TypeScript Cloudflare D1 Cloudflare Queues Cloudflare Workers Nuxt WorkOS TRPC SQLite
Drizzle

- Built a DX-focused SDK in TypeScript
- Built an (experimental) fully automated envelope encryption microservice
- Built a B2B SaaS platform with billing, SSO, and developer portal
- Created in-depth developer-facing documentation

Chief Technology Officer (CTO) CheetahBooking (Co-founded)

2023 - 2024

TypeScript MySQL Nuxt

- Built a B2B SaaS MVP on a very tiny budget
- Built an automated scheduling engine
- Built a very intuitive form builder
- Implemented our CI/CD pipeline with E2E test coverage
- Converted Figma designs into a pixel-perfect functional application

Software Engineer OrderDive (Founded)

2017 - Present

TypeScript	Linux	Vercel	Cloudflare Workers	MQTT	Tailwind	Nuxt	TRPC	Vue	MySQL
------------	-------	--------	--------------------	------	----------	------	------	-----	-------

- Created a cloud connected ticket printer
- Created a sandboxed design system that allowed for in-depth white-labeling
- Provisioned and maintained MQTT broker nodes
- Created a reservation microservice with dynamic schedule capacity and daylight-savings immunity
- Created a restaurant owner dashboard and menu editor
- Created the customer facing restaurant online ordering flow
- Created AI/LLM-powered tools to help business owners to generate marketing copy

Software Engineer Personal projects

Tauri (Mobile & Desktop)	Golang	Rust	TypeScript
--------------------------	--------	------	------------

- Created & published an app built with React Native for cosplayers to trigger sound effects using a concealed bluetooth device
- Created a desktop app (Linux, Windows, & MacOS) and self-hostable server for syncing emulated retro game save files across devices (Looking to open source it soon)
- Created a system tray utility app in Golang (Go) for MacOS to quickly find the server process that is blocking my development server port. The program finds the clogged port and kills the parent process.

Skillsets

Systems Architecture	Cloud Architecture	Design Systems	Building Mobile Apps (iOS & Android)			
Embedded Systems	Building Desktop Apps	IoT	Microservices	Unit testing	E2E testing	
Product Development	Progressive Web Apps	Prototyping	MPA	SPA	Jamstack	Serverless
Building integrations	Web Services	Data Extraction	eCommerce
